Review of Building Arrays with Tiles

Name: _____

Date: _____

Answer the following questions about arrays and what you learned in class.

1. What is an array?

2. Arrays are like neat rows and ____ of tiles.

3. What do we use to count the total number of objects in an array?

- A. Rows and columns
- B. Colors
- C. Shapes

4. Arrays can help us understand multiplication.

True False

5. How many tiles are in an array with 3 rows and 4 columns?

6. What does God love in mathematics?

- A. Chaos
- B. Order
- C. Randomness

7. We can count the ____ and columns to find total objects.

8. Arrays represent equal groups of objects.

True False

9. How do arrays help us in math?

- A. They make things messy
- B. They help us organize numbers
- C. They are just for fun

10. What did we learn about arrays today?

Answer Key

1. An array is a group of objects arranged in rows and columns. 2. columns 3. Rows and columns 4. True 5. There are 12 tiles in total. 6. Order 7. rows 8. True 9. They help us organize numbers 10. We learned that arrays are organized and show groups of objects.
