## Understanding Energy Flow in Ecosystems

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions about food chains and ecosystems.

1. What did you learn about food chains today?

---

---

2. What do plants use to capture energy?

- A. Food
- B. Sunlight
- C. Water

3. Animals can be part of multiple food chains.

- True       False

4. Energy always starts with \_\_\_\_ capturing sunlight.

5. Name one animal that might be in our local ecosystem.

---

6. How do different animals get their energy?

- A. From plants
- B. From other animals
- C. Both A and B

7. Food chains only include plants.

- True       False

8. God gave every animal and bird \_\_\_\_ for food.

9. What is one way energy moves through an ecosystem?

---

10. Which part of the ecosystem captures sunlight?

- A. Animals
- B. Plants
- C. Soil

---

### Answer Key

1. Food chains show how energy moves from plants to animals. 2. Sunlight 3. True 4. plants 5. A rabbit. 6. Both A and B 7. False 8. green herb 9. Through food chains from plants to animals. 10. Plants
