## Review Worksheet for 3rd Grade Math

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you learned about estimation and God's provision.

1. What is rounding used for in math?
  - A. Making exact calculations
  - B. Making quick guesses about numbers
  - C. Creating complex equations
2. Jesus fed the 5,000 using just \_\_\_\_ loaves and \_\_\_\_ fish.
3. How did Jesus show God's provision when feeding the crowd?

4. Why is it helpful to round numbers when solving real-world problems?
  - A. It makes numbers bigger
  - B. It helps us make quick, smart guesses
  - C. It makes math harder

5. Match the estimation method with its description.

Rounding to the nearest ten

Estimating larger numbers

Rounding to the nearest hundred

Estimating smaller numbers

6. What does the story of Jesus feeding the 5,000 teach us about God's care for details?

7. In the story, Jesus told his disciples to gather up the broken pieces so that nothing was \_\_\_\_.

8. What did Jesus do before distributing the food?

- A. Gave thanks
- B. Counted the food
- C. Rounded the numbers

9. How might the disciples have estimated how much food was needed for the crowd?

10. What was one of the key lessons from today's lesson on estimation?

- A. Estimation is not important
- B. Rounding helps us understand big numbers
- C. Math is always exact

### Answer Key

1. Making quick guesses about numbers 2. five, two 3. He provided enough food for everyone and had leftovers. 4. It helps us make quick, smart guesses 5. Estimating smaller numbers 6. It shows that God wants us to manage our resources carefully and He provides abundantly. 7. lost 8. Gave thanks 9. They could have looked at the number of people and guessed how much food each would eat. 10. Rounding helps us understand big numbers
