## Understanding Fractions

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the questions below to show what you learned about equivalent fractions.

1. What are equivalent fractions?

- A. Fractions that look the same
- B. Fractions that represent the same amount
- C. Fractions with different numerators

2. To find an equivalent fraction, we can multiply the numerator and denominator by the same \_\_\_\_.

3. Why is it important to know about equivalent fractions?

---

---

4. Match the fraction to its equivalent fraction.

1/2

1/4

2/4

1/2

3/6

2/3

5. Which of the following is an equivalent fraction for  $1/3$ ?

- A.  $2/6$
- B.  $3/4$
- C.  $1/2$

6. Using fraction bars helps us to visualize \_\_\_\_ fractions.

7. What did we learn about equivalent fractions today?

---

---

8. What is one way to create an equivalent fraction?

- A. Add a number to the numerator
- B. Multiply the numerator and denominator by the same number
- C. Subtract from the denominator

9. Draw a line from each fraction to its visual model.

1/2

Two equal parts

3/4

Three out of four parts

10. Can you show me an example of an equivalent fraction?

---

---

1. Fractions that represent the same amount 2. number 3. It helps us understand that different fractions can mean the same amount. 4.  $\frac{2}{4}$  5. equivalent 6. We learned how to create and identify fractions that are equal in value. 7. Multiply the numerator and denominator by the same number 8. Three out of four parts 9.  $\frac{1}{2}$  is equivalent to  $\frac{2}{4}$  because they are the same amount. 10.
