Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you learned about area and perimeter.

1. What is area?

- A. The distance around a shape
- B. The space inside a shape
- C. The height of a shape

2. To find the perimeter of a rectangle, you add the lengths of all the \_\_\_\_ together.

3. Explain one way to break down a word problem.

---

---

4. Match the problem to the correct calculation method.

Finding area of a rectangle

Length x Width

Finding perimeter of a square

4 x Side Length

5. Which of the following is a step in solving a word problem?

- A. Guessing the answer
- B. Choosing a calculation method
- C. Ignoring the numbers

6. In real life, we use area and perimeter to measure things like \_\_\_\_ and \_\_\_\_.

7. What did you find most interesting about area and perimeter?

---

---

8. What does Proverbs 11:1 teach us about measurements?

- A. It's okay to guess.
- B. Accuracy is important.
- C. Measurements don't matter.

9. To find the area of a square, you multiply the length of one side by \_\_\_\_ itself.

10. What are two important details to look for in a word problem?

---

---

---

## Answer Key

1. The space inside a shape 2. sides 3. I can highlight important information and write down what I need to find. 4. Finding area of a rectangle - Length x Width, Finding perimeter of a square - 4 x Side Length 5. Choosing a calculation method 6. rooms, yards 7. I liked how we can measure our rooms and know how much space we have. 8. Accuracy is important. 9. itself 10. You should look for numbers and what the problem is asking for.
