

# Measuring God's Creation Review

BibleMouse.com

## Understanding Measurement in Nature

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on the lesson about measuring God's creation.

1. What does measuring help us understand about natural objects?

- A. Their color
- B. Their size and shape
- C. Their smell

2. God used mathematical \_\_\_\_ to create the universe.

3. Why is accuracy important when we measure objects in nature?

---

---

4. Match each measurement term with its definition.

Perimeter

The distance around an object

Area

The amount of space inside an object

5. What scripture talks about God's wisdom in creation?

- A. Genesis 1:1
- B. Proverbs 3:19
- C. Psalm 104:24

6. Measuring helps us learn about God's \_\_\_\_ in creation.

7. How might God use measurements in creation?

---

---

8. What is one technique we learned for measuring natural objects?

- A. Weighing them
- B. Counting them
- C. Using a ruler

9. Draw a line from each unit of measurement to the type of object it measures.

Inches

Length of a leaf

Square inches

Area of a rock

10. What did we learn about measuring during our Nature's Measurement Adventure?

---

---

---

### Answer Key

1. Their size and shape 2. precision 3. Accuracy helps us understand the true size and shape of the objects. 4. The distance around an object 5. Proverbs 3:19 6. design 7. God might use measurements to ensure everything is perfectly placed, like the stars and the earth. 8. Using a ruler 9. Length of a leaf 10. We learned how to measure the dimensions of leaves and rocks accurately.
