Understanding Types of Patterns

Name: _____

Date: _____

Answer the following questions based on what you learned about patterns and God's creation.

1. What is a regular pattern?

- A. A pattern that changes gradually
- B. A consistent and predictable repetition
- C. A pattern that spreads from a central point

2. How do alternating patterns work? Give an example.

3. A pattern that spreads out from a central point is called a ____.

4. Progressive patterns show elements that stay the same throughout.

- True False

5. Which pattern type involves elements gradually changing?

- A. Regular
- B. Progressive
- C. Radial

6. In what ways do you think patterns in nature reflect God's creative design?

7. The earth is full of God's creatures, demonstrating His ____ in design.

8. Radial patterns are not found in nature.

- True False

9. Which pattern type would you most likely find in a flower?

- A. Regular
- B. Alternating
- C. Radial

10. What challenges did you face while creating your artwork with patterns?

Answer Key

1. A consistent and predictable repetition 2. Alternating patterns have two elements that trade positions. For example, a pattern of squares and circles in a row is alternating. 3. radial 4. False 5. Progressive 6. Patterns in nature, like the arrangement of petals in flowers, show God's intention and creativity. They are beautiful and serve a purpose. 7. intentionality 8. False 9. Radial 10. I found it hard to keep the patterns consistent, especially when using different colors.
