### Answer Key

1. Tropical, Dry, Temperate, Continental, Polar, Mediterranean 2. Climate zones affect how people dress, what crops they can grow, and the types of activities they can do. For example, people in colder areas might wear warm clothes and have different jobs than those in warmer areas. 3. True 4. Earth 5. Tropical 6. I found it interesting how different climates support various plants and animals. It made me think about how we adapt to our environment. 7. False 8. all 9. Dry 10. God created diverse environments to show His creativity and to provide different habitats for various creatures. It helps us learn to adapt and appreciate the world.
