- A. $<$, $>$, $=$
- B. $+$, $-$, \times
- C. $=$, $'$, H

2. God counts the number of the ____ and calls them all by their names.

3. How do place values help us understand numbers? Give an example.

4. God's precision in counting shows how much He cares about creation.

- True False

5. Which of the following is a correct way to compare the numbers 245 and 254?

- A. $245 > 254$
- B. $245 < 254$
- C. $245 = 254$

6. Using inequality symbols helps us to show the relationship between two ____

7. Why is comparing numbers important? Explain in your own words.

8. Place values only apply to three-digit numbers.

- True False

9. What does the number 5 represent in the number 5,432?

- A. Five hundred
- B. Five
- C. Five thousand

10. How many stars do you think God has counted? Write your guess and why you think that.

Answer Key

1. <, >, = 2. stars 3. Place values show us the value of each digit in a number. For example, in 345, the 3 is in the hundreds place, which means it represents 300. 4. True 5. $245 < 254$ 6. numbers 7. Comparing numbers helps us understand which is larger or smaller, which can help us make decisions. For example, knowing which number is greater can help us choose the better option. 8. False 9. Five 10. I think God has counted billions of stars because there are so many in the sky, and He created them all.
