Math: Angle Addition and Classification

Name: _____

Date: _____

Answer the following questions based on the lesson content about angles.

1. What is an acute angle?

- A. Exactly 90 degrees
- B. Less than 90 degrees
- C. Between 90 and 180 degrees

2. A right angle is ____ degrees.

3. An obtuse angle is greater than 180 degrees.

- True False

4. Why is it important to classify angles accurately?

5. What tool helps us measure angles?

- A. Ruler
- B. Protractor
- C. Compass

6. Understanding angles requires careful ____ and learning.

7. Acute angles can be greater than 90 degrees.

- True False

8. How can understanding angles help us in real life?

9. Which angle is between 90 and 180 degrees?

- A. Acute
- B. Obtuse
- C. Right

10. What was your favorite angle discovery today?

Answer Key

1. Less than 90 degrees 2. 90 3. False 4. Classifying angles helps us understand their properties and how to use them in real-life situations. 5. Protractor 6. observation 7. False 8. It can help us in construction, design, and understanding shapes in our environment. 9. Obtuse 10. I learned how to identify angles using a protractor, and it was fun to classify them correctly!
