## Understanding How Our Body Works Together

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you've learned about human body systems.

1. What does the respiratory system provide to the blood?

- A. Nutrients
- B. Oxygen
- C. Energy

2. How do the circulatory and respiratory systems work together?

---

---

3. The digestive system breaks down food to provide \_\_\_\_ for the body.

4. If one body system stops working, it can affect the entire body.

- True       False

5. Which body system distributes oxygen and nutrients?

- A. Respiratory system
- B. Circulatory system
- C. Digestive system

6. What surprised you about how body systems work together?

---

---

7. Psalm 139:14 reminds us that we are \_\_\_\_ and wonderfully made.

8. The digestive system is responsible for providing oxygen.

- True       False

9. What is one reason we should appreciate God's design of human body systems?

- A. They are simple
- B. They are all separate
- C. They work together in complex ways

10. In what ways can you create a visual concept map to show body system interactions?

---

---

---

---

### Answer Key

1. Oxygen    2. The respiratory system provides oxygen to the blood, and the circulatory system carries that oxygen to the rest of the body.    3. energy    4. True    5. Circulatory system    6. I was surprised to learn how each system relies on the others for our bodies to function properly.    7. fearfully    8. False    9. They work together in complex ways    10. I can use colorful drawings and arrows to show how each system connects and works with others.
