Understanding Earth's Structure

Name: _____

Date: _____

Answer the following questions based on what we learned about tectonic plates.

1. Which of the following is NOT a major tectonic plate?

- A. Pacific Plate
- B. North American Plate
- C. Atlantic Ocean

2. What did we learn about Earth's structure in this lesson?

3. The Eurasian Plate is one of the major tectonic plates.

- True False

4. Tectonic plates move and interact, which can lead to ____ and earthquakes.

5. What happens when tectonic plates move against each other?

- A. They create mountains
- B. They cause earthquakes
- C. Both of the above

6. How does understanding tectonic plates help us appreciate God's creation?

7. Tectonic plates are small sections of Earth's crust that do not move.

- True False

8. The major tectonic plates include the Pacific, North American, and ____ plates.

9. Which scripture reminds us of God's role in creating the Earth?

- A. Genesis 1:1
- B. Job 38:4-6
- C. Psalm 104:5

10. Can you find where plates meet on our map? Please describe what you see.

Answer Key

1. Atlantic Ocean 2. We learned that Earth's structure consists of large tectonic plates that move and create geological features. 3. True 4. volcanoes 5. Both of the above 6. Understanding tectonic plates shows us the complexity and design of Earth, which reflects God's creativity and power. 7. False 8. Eurasian 9. Job 38:4-6 10. I see where the Pacific Plate meets the North American Plate, and it shows geological activity like earthquakes.
