## Understanding God's Creation through Earth Science

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you learned about God's power in Earth's geological processes.

1. What did you learn about God through Earth science?

---

---

2. What does Psalm 104:5-6 tell us about the earth?

- A. It can be moved easily
- B. It was created to stand forever
- C. It is only covered by air

3. God's creative power can be seen in the \_\_\_\_ processes of the Earth.

4. Studying science can help us appreciate God's intricate creation.

- True       False

5. How can studying science help us worship God?

---

---

---

6. Which geological process shows God's ongoing creative work?

- A. Plate tectonics
- B. Weathering
- C. Both of the above

7. The waters stood above the \_\_\_\_ according to Psalm 104:6.

8. Earth's complex systems demonstrate random chance.

- True       False

9. What parts of Earth science make you wonder about God's design?

---

---

10. What do geological processes help us understand about God?

- A. His power and design
- B. His indifference
- C. His absence

---

### Answer Key

1. I learned that God is powerful and created the earth with amazing processes that work together. 2. It was created to stand forever 3. geological 4. True 5. Studying science helps us understand the beauty and complexity of God's creation, which makes us more thankful and worshipful. 6. Both of the above 7. mountains 8. False 9. I wonder about the way mountains form and how rivers create valleys, showing God's creativity. 10. His power and design
