- A. Solar power
- B. Coal
- C. Natural gas

6. How can scientific knowledge help protect the environment?

---

---

7. Sustainable agricultural practices can help reduce harm to the environment.

- True       False

8. What is one example of habitat restoration?

- A. Planting trees in a deforested area
- B. Building factories
- C. Using more plastic

9. Conservation solutions aim to address environmental \_\_\_\_ challenges.

10. Why is it important for us to care for God's creation?

---

---

---

### Answer Key

1. Care and protection of creation   2. Renewable energy technologies and habitat restoration strategies.   3. False   4. cultivate   5. Solar power   6. It helps us understand how ecosystems work and develop solutions to environmental problems.   7. True   8. Planting trees in a deforested area   9. challenges   10. It is our responsibility as stewards to protect the environment God has given us.
