### Answer Key

1. Tropical, Dry, Temperate, Continental, Polar, Mediterranean    2. Climate affects what clothes we wear and how we grow food. For example, farmers in warm climates can grow tropical fruits, while in cold climates, they might grow root vegetables.    3. landscape    4. False    5. Animals live in regions where their needs for food, water, and shelter are met. For example, polar bears live in cold climates

because they are adapted to hunt seals on ice. 6. Dry 7. riches 8. False 9. In wet climates, homes are often built on stilts. 10. I found it interesting that different climate zones can support different types of plants and animals. It's amazing how God designed each zone to support life in unique ways.
