## Reviewing Place Value and Comparison Symbols

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you learned about comparing numbers and God's understanding of numerical magnitude.

1. What does the symbol '>' mean?

- A. Less than
- B. Greater than
- C. Equal to

2. In comparing multi-digit numbers, the number on the left is \_\_\_\_ if it is larger.

3. The symbol '<' indicates that the number on the left is larger.

- True       False

4. How do comparison symbols help us understand numbers?

---

---

---

5. What does the '=' symbol represent?

- A. Not equal
- B. Equal to
- C. Greater than

6. According to Psalm 147:4, God counts the number of the \_\_\_\_ and names them.

7. Understanding numbers reflects God's precision.

- True       False

8. Why is it important to understand place value when comparing numbers?

---

---

---

9. When comparing 345 and 432, which symbol would you use?

- A. <
- B. >
- C. =

10. God's understanding of numerical magnitude is described in the verse where He calls the stars by their \_\_\_\_.

---

### Answer Key

1. Greater than   2. greater   3. False   4. Comparison symbols show us which number is larger or if they are equal. This helps us compare values easily.   5. Equal to   6. stars   7. True   8. Place value helps us see the value of each digit in a number. It ensures we compare the numbers correctly based on their size.   9. <   10. names
