Understanding Multi-Digit Multiplication and Stewardship

Name: _____

Date: _____

Answer the following questions based on our lesson about multi-digit multiplication and biblical stewardship.

1. What was the most challenging part of today's problems? Explain why it was challenging.

2. What does the parable in Matthew 25:14-15 teach us about our talents?

- A. To hide them
- B. To multiply them
- C. To ignore them

3. Multiplication can help us understand how to use our resources wisely.

True False

4. We can apply multiplication skills to ____-world scenarios.

5. How can multiplication help us understand stewardship? Provide an example.

6. What is one method we can use to check our multiplication work?

- A. Ask a friend
- B. Use a calculator
- C. Estimate the answer

7. We should only focus on the final answer and not the steps taken to get there.

True False

8. To solve multi-step problems, we need to break them down into ____ steps.

9. Which of the following best describes stewardship?

- A. Wasting resources
- B. Using resources wisely
- C. Ignoring responsibilities

10. Describe a real-world situation where multiplication might be used to demonstrate stewardship.

Answer Key

1. The most challenging part was breaking down the steps because I had to think carefully about each part of the problem. 2. To multiply them 3. True 4. real 5. Multiplication helps us understand stewardship by showing us how to manage our resources effectively. For example, if we have 5 bags of seeds and each bag has 10 seeds, we can multiply to find out that we have 50 seeds to plant. 6. Estimate the answer 7. False 8. manageable 9. Using resources wisely 10. If a farmer has 12 fields and plants 15 rows of corn in each field, he can use multiplication to determine the total number of rows he has. This shows stewardship by maximizing his land's productivity.
