Exploring Earth's Place in the Solar System

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Answer the following questions based on what you've learned in the lesson about Earth's unique characteristics and its place in the solar system.

1. What is one reason Earth is in the habitable zone of the solar system?

- A. It is closest to the Sun
- B. It has a perfect temperature range
- C. It has no atmosphere

2. What are three characteristics of Earth that support life?

---

---

---

3. The atmosphere on Earth protects and sustains \_\_\_\_ .

4. Earth is the only planet known to support life in our solar system.

- True       False

5. Which characteristic of Earth helps to protect it from solar radiation?

- A. Water
- B. Atmosphere
- C. Magnetic field

6. How does Earth's distance from the Sun affect its ability to support life?

---

---

---

7. In Psalm 104:24, it states that God made the earth with \_\_\_\_ .

8. God designed Earth intentionally to be a unique place for life.

- True       False

9. What is one way we can see God's wisdom in Earth's design?

- A. The presence of mountains
- B. The variety of plants
- C. The perfect conditions for life

10. In what ways do you think scientists and theologians can work together to understand Earth's design?

---

---

---

---

Answer Key

1. 1 2. Earth has a breathable atmosphere, liquid water, and a protective magnetic field. 3. life 4. True 5. Magnetic field 6. The distance helps maintain a temperature range that allows for liquid water, which is essential for life. 7. wisdom 8. True 9. The perfect conditions for life 10. They can collaborate to study how natural laws reflect God's creation and how life thrives on Earth.
