Understanding Weather and Climate Systems

Name: _____

Date: _____

Answer the following questions based on our lesson about climate zones and research projects.

1. Which climate zone is NOT one of the options for your research project?

- A. Tropical
- B. Desert
- C. Temperate

2. The polar climate zone is known for its warm temperatures.

- True False

3. What are three distinct global climate zones you can choose for your project? List them.

4. God designed our climate systems, as stated in Genesis 8:22, mentioning seed time and harvest, and ____ and ____

5. What is one way humans adapt to different climate conditions? Circle the correct answer.

Wearing appropriate clothing

Ignoring the weather

Building tall buildings

6. Why is understanding climate important for humans?

7. In a temperate climate zone, you would typically find ____ trees that change with the seasons.

8. The tropical climate zone has distinct seasons like summer and winter.

- True False

9. What type of vegetation is commonly found in polar climate zones?

- A. Cacti
- B. Evergreen trees
- C. Tropical plants

10. What challenges might you experience while preparing your climate zone research presentation?

Answer Key

1. Desert 2. False 3. The three climate zones are tropical, temperate, and polar. 4. cold, heat 5. Wearing appropriate clothing 6. Understanding climate helps us prepare for weather changes and protect our environment. 7. deciduous 8. False 9. Evergreen trees 10. I might find it hard to find enough information or understand some complex terms.
